ART OF FIRE

Over time, the S.T. Dupont lighter, the emblematic product of Famous French Luxury House, has become a cult object passed down from generation to generation.

TRADITIONAL LIGHTERS WITH A YELLOW FLAME:

In 1941, S.T. Dupont created the first luxury lighter. Practical and sophisticated, it was also synonymous with elegance thanks to its pure lines, its fine materials and its reassuring, satisfying weight. From the body to the tank, S.T. Dupont lighters are fashioned entirely from a block of solid brass resulting in a hard-wearing object that can withstand the test of time. This precious object is adorned with silver, gold, palladium or lacquer.

INNOVATION WITH TORCH FLAME LIGHTERS:

In its constant quest for innovation, S.T. Dupont launched a new line of torch flame lighters in 2000; light and ergonomic ensuring efficient lighting in all circumstances.

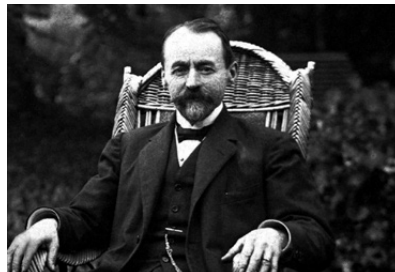

HISTORY

The story begins with a man of exceptional destiny: Simon Tissot Dupont. In 1872, he created a luggage and leather goods workshop, which then began to produce a steady stream of exceptional products for the highest social circles.

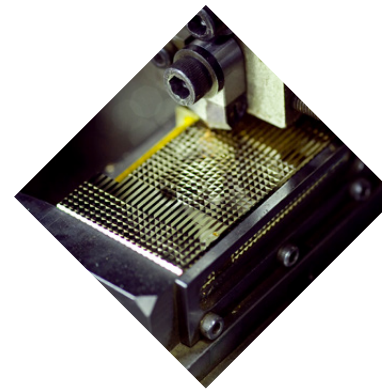

In 1941, S.T. Dupont owes one of its greatest successes, its first luxury petrol lighter, to the Maharajah of Patiala. This was quickly followed by the iconic Ligne 2, a design harking back to the thirties, adorned with silver, gold, palladium, lacquer and other most precious metals. It has since become a genuine cult item, recognisable all over the world, by the sound it makes: his famous "cling".

Jackie Kennedy loved her Dupont lighter so much

that in 1973 she ordered a pen to match. Another Dupont icon was born: the "Classique". Again, the workshop brought forward its exceptional craftsmanship. A new product, a new sensation: people went wild for the Classique, not only for its impeccable looks, but also its perfect balance and fluid writing.

In 2017, S.T. Dupont celebrates 145 years of prestige and exclusivity, and continues to express its passion — creating exceptional products for exceptional people.

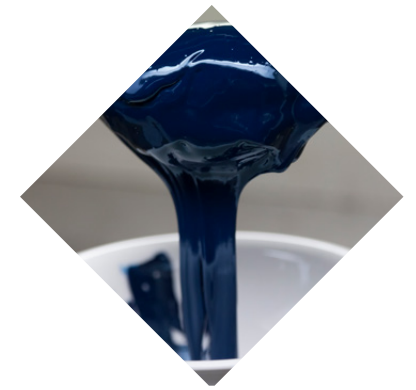

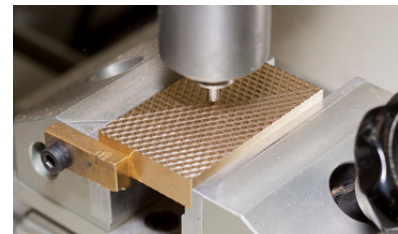

MASTER GOLDSMITH

The art of goldsmith and silversmiths as of jewellers has always played an important role in the creation of S.T. Dupont objects.

Sumptuous travel bags, coveted by high society throughout the world at the beginning of the twentieth century, were complemented by luxurious gold and silver accessories, expertly polished or decorated with fine guilloché.

This means, metal has become a means of decoration, either elegantly understated or highly sophisticated. S.T. Dupont's master craftsmen display their skills in ever-changing combinations of Diamond Head, gadroon and cable motifs.

Whether gently guilloché by hand or created using the latest digital techniques, plated in gold, palladium or silver, S.T. Dupont objects reflect the House's unique expertise and passion.

MASTER LAQUERER

Natural lacquer, with its pearl-like shimmer and its fascinating shine and depth, is one of the finest materials to adorn S.T. Dupont's objects.

Lacquer was first used during the second millennium BC. It was introduced in Europe during the 18th century at the height of the fashion for lacquer under the Ming Dynasty.

S.T. Dupont's craftsmen are among the few to have mastered the art of lacquer, a difficult organic material, by rediscovering and perfecting ancient Japanese and Chinese techniques. It is resistant to shocks, scratches and fire.

All S.T. Dupont accessories in natural lacquer are engraved with a lacquer leaf.
