CRAFTSMANSHIP PRODUCTION

"Passion, conviction, courage, craftsmanship and exclusivity are the elements that distinguish every Maccarrone creations"

www.maccarronehandcraft.com

DESIGN PROCESS

Product design, hinges and metal accessories, combination of materials and third-party components. Everything is carefully examined by our design office.

Sizing, sanding, milling, assembly and varnishing. The whole process takes place in our artisan workshop in Camaiore, under the careful guidance and in the expert hands of our craftsman.

TIME OF PRODUCTION

Attention for details, skilled craftsmanship and state of art results take time.

That's why we need four to eight weeks to produce one of our humidors.

“Time is necessary to reach perfection”

MARQUETRY

We can reproduce complex graphics using the most precious woods, combining colors and wood essences.

A magnificent result of micrometric precision, thanks to our top quality laser cutting technology.

The Marquetry is an ancient technique that dates back to the 1300s.

We use it with state-of-the-art machinery but always with a care and meticulousness that only a few craftsmen know.

KNOW HOW

Maccarrone team brings decades of experience in cabinet making, more than 20 years specific experience in yacht interiors production and assembly.

We are specialists in design, technology and innovation, enthusiastic about every new idea and competent in planning and implementing unique projects, even if they become very complex.

MADE IN TUSCANY

The Maccarrone laboratory is located in Camaiore, a town in the province of Lucca. Our production takes place entirely in Tuscany, a land full of art. World reference point for fashion and craftsmanship.

We are proud to offer an original Made in Italy product. Since October 2022 our creations have been certified 100% Made in Italy IT-01 by the bo-dy for the protection of Italian producers, Promindustria S.p.a..

SELECTED MATERIALS

www.maccarronehandcraft.com

PRECIOUS MATERIALS

Macassar Ebony, Zebrano, Rosewood, Mahogany, Erable and many different Burl woods just to mention some of the precious woods we personally select from our trusted suppliers around the world.

To complement the beautiful woods we also use precious stones, resins, mother of pearl, metal transfers and 24 karat gold leaf.

METAL ACCESSORIES

Solid brass milled and turned hinges. Locks, knobs and all metal accessories are made in solid milled brass. Chrome or 24 karat gold-plated finish is made by a galvanic process.

We design all the metal accessories that are produced by our trusted metal artisans in Florence.

ABOUT US

the brand

The project was born from the idea of the young entrepreneur Cristian Francesco Maccarrone. Born in 1993, originally from Palermo, he moved to Tuscany at the age of seven, precisely to Viareggio, where his father Giuseppe began a business of furnishing production for yachts and sailing boats. Alongside his father, Cristian soon learned the basics of carpentry, approached woodworking and deepened in its tools.

Creativity, ingenuity and a strong aptitude for manual skills accompany the young entrepreneur from an early age: when he was just 11 years old, he used to make cardboard models of cars. From the chassis to the leather interiors made with the leftovers of leathers from his father's works on the shipyards.

Over the years Cristian developed various passions: from scale modeling to watchmaking. It was 2018, during a travel to Ibiza, when he entered for the first time in a tobacconist's "walk-in humidor". The passion for cigars was born. Few years of tastings, studies and insights into the business, convinced him to undertake a path as ambitious as singular: produce Humidors and cigar accessories with a unique and unmistakable style, intended for the most demanding customers. In 2020, in a full pandemic emergency, Cristian abandoned his job to devote himself entirely to his own project.

Thus was born, MACCARRONE.

COLLECTIONS
